

Shaping the future
of aged care

Innovator Training Program for your team

A flexible, free training program to increase the skills of your aged care workforce to solve an organisation-wide problem and embed evidence-based change.

Do you:

- Have an organisation-wide problem to solve?
- Want to find the best evidence to make a change?
- Want to develop your staff to find brave and innovative solutions?
- Need help to develop a tailored solution and an appropriate implementation plan?

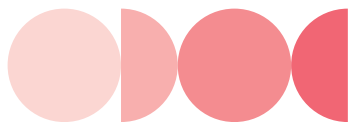

Then a Tailored or In-house Innovator Training Program is for you!

The Innovator Training Program (ITP) can be tailored exclusively for a group of staff from your organisation, who will work together to solve a specific problem in your workplace.

Your staff will learn how to understand the problem, find a best-practice evidence-based solution, adapt it to your organisation, plan its implementation, pitch it to stakeholders and measure the outcome of the change.

The **Tailored ITP** is 100% online, delivered to your team of 5+ staff via a series of self-directed learning modules and facilitated workshops with ARIIA staff.

The **In-house ITP** is delivered in the same way to your team of 8+ staff, plus provides an additional **2.5 days of in-person group workshops** at your workplace to discuss, contextualise and adapt solutions.

Innovation training tailored to you

Our Tailored and In-house Innovator Training Programs include:

- Online modules and workshops to define the problem, find relevant evidence, tailor and evaluate the solution and form a project plan.
- Development of staff skills to 'pitch' the project to stakeholders.
- Access to ongoing peer support during project implementation.
- Access to continuous learning and development opportunities via the ARIIA Innovation Network.
- Activities delivered over a negotiated timeframe (approx. 5-10 weeks).

Plus In-house ITP includes:

2.5 days of in-person group workshops to discuss, contextualise and adapt solutions - a fantastic opportunity to gather a group of your staff together to solve a problem and develop their skills.

Sessions are filling fast, so enquire now to discuss how we can tailor the Innovator Training Program to your team.
