

Shaping the future
of aged care

Innovator Training Program

Are you working in the aged care sector and have a problem to solve in your workplace? The free Innovator Training Program is designed to provide you or your team with tools and skills to use knowledge and evidence to solve a problem in your workplace.

The Innovator Training Program (ITP) supports participants to implement an evidence-based solution that is appropriate for local settings and organisations.

Participants begin the training with a problem they have identified, and leave with a solution, a project plan, and a pitch to present to stakeholders.

The free training is facilitated online via self-directed learning modules and workshops supported by expert ARIIA staff, who provide participants with tailored support alongside a dedicated Sponsor from their workplace.

The training provides transferable skills and knowledge to:

- Understand the components of a problem.
- Find best-practice evidence to solve the problem.
- Manage change and innovation projects within the workplace.
- Measure if the change has made a difference.

Up to \$2,000 per participant (plus GST if applicable) is available to the employing organisation as a contribution to salary costs.

Make brave changes to aged care and services

ITP for an Individual

As an individual Innovator from your organisation, you will learn alongside a cohort of peers who work in aged care across Australia.

The ITP is delivered in rounds throughout the year, and you can choose from three schedules that spread the 110 hours of training over 3, 5 or 10 weeks.

We understand that it can be difficult to identify just one problem to solve in your workplace, so ARIIA is delivering Themed ITPs. Designed for individual Innovators who want to undertake the ITP but need guidance to identify a specific problem to solve. Find out more by scanning the QR code below.

ITP for a Team

The ITP can be tailored exclusively for a group of staff from your organisation, who will work together to solve a specific problem in your workplace.

The **Tailored ITP** is 100% online, delivered to your team of 5+ staff via a series of self-directed learning modules and facilitated workshops with ARIIA staff.

The **In-house ITP** is delivered in the same way to your team of 8+ staff, plus an additional **2.5 days of in-person group workshops** at your workplace to discuss, contextualise and adapt solutions.

ARIIA Innovation Network

After completing the ITP, you will continue to be supported by the Innovation Network. You will have access to a range of valuable resources and extension topics, project management tools and grantsmanship resources.

The Innovation Network provides an opportunity to stay connected with ARIIA staff and your ITP peers, share ideas and learn from others' implementation experiences.
